

Moving Objects in a PDF document

If the text isn't inside the margins on all pages. It may be moved using **Select Objects** in the PitStop toolbar to the left.

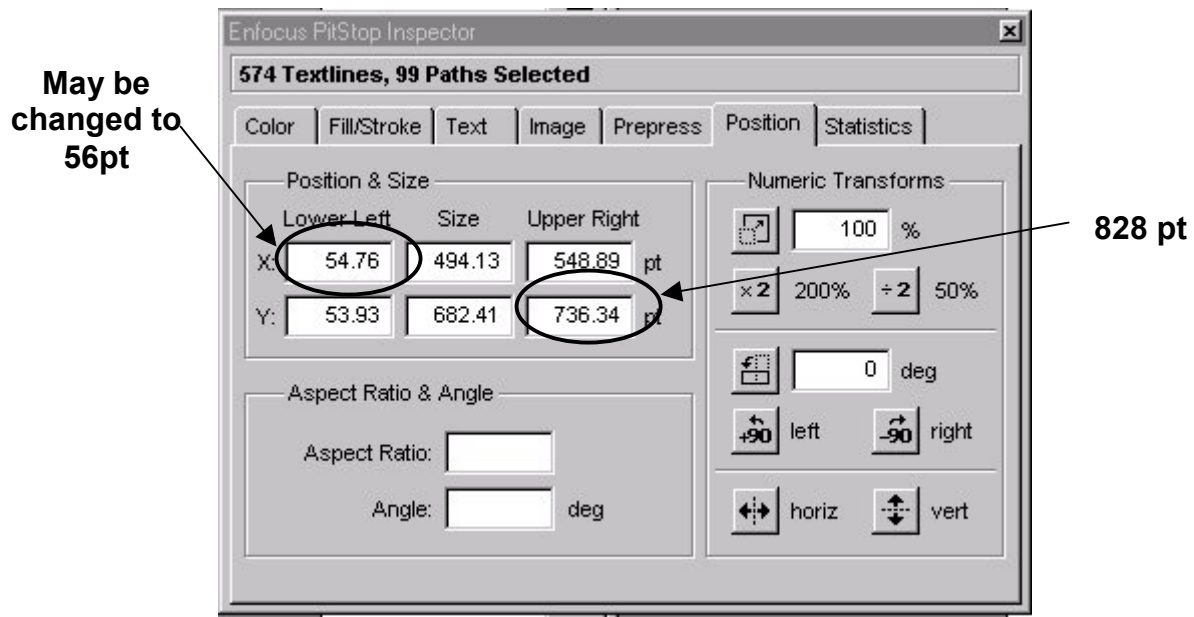

Once you click on this button, the Enfocus PitStop Inspector should appear, and then select the **Position** tab:

Click on the document, and select the object that you want to move:

The **Enfocus PitStop Inspector** should be changed (depending on your selection):

Move or scale the selected object by changing the values in the Position & Size area.

Lower left: Distance between the lower left point of the object and the lower left corner of the page.

Size: height and / or width

Upper Right: Distance between the upper right point of the object and the lower left corner of the page.
