

**EPICS DIRECTIONS TO ACCOMODATE LARGE PROJECTS AND
INCORPORATE NEW TECHNOLOGY**

L. Dalesio, Lanl; J. Hill, Lanl; M. Kraimer, Anl; R. Chestnut, Slac; H. Shoaee, Slac

EPICS will have two major projects that will push the next phase of development. The NLC will push scalability by requiring support for an order of magnitude more channels than existing facilities. SNS will be pushing to incorporate the latest technology within a large collaboration. As these projects have selected EPICS in the design phase, we have the oppurtunity to provide improvements in ease of use, control of degraded modes, and new functionality.
