# BIS2 – Motivation for Change

## BIS1:

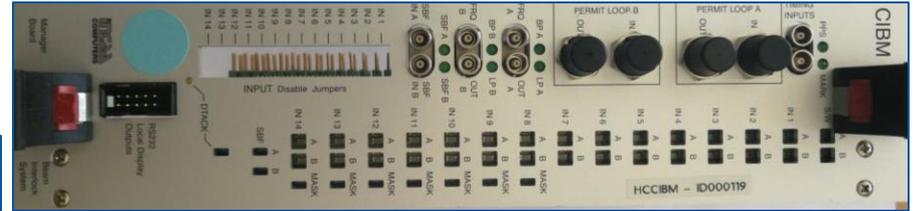

- 2x CIBMs per crate, each interlocking A & B
- 2x CIBTs per crate, handling Test + Monitor
- Can interlock up to 14 users

## BIS2:

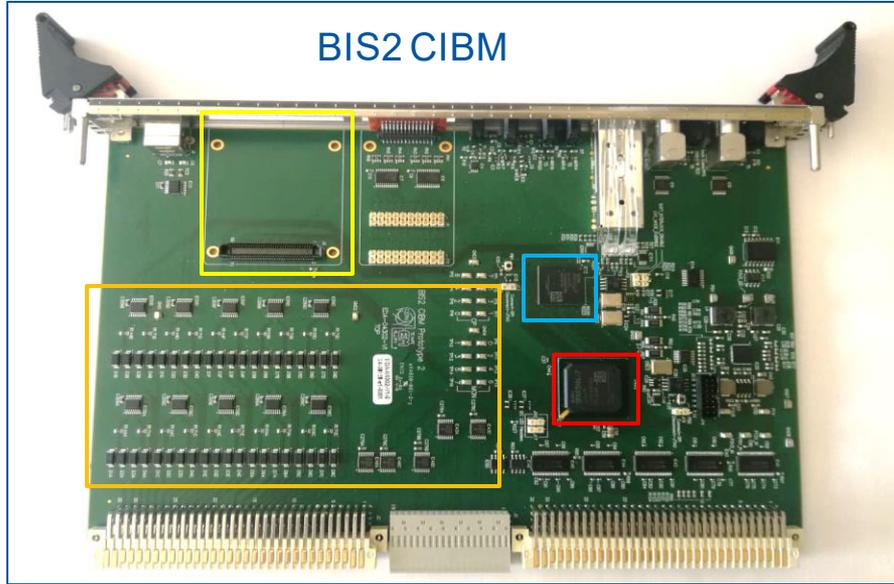

- 4x CIBMs per crate, each interlocking A or B
- All CIBMs now handle Test + Monitor
- Can interlock up to 20 users

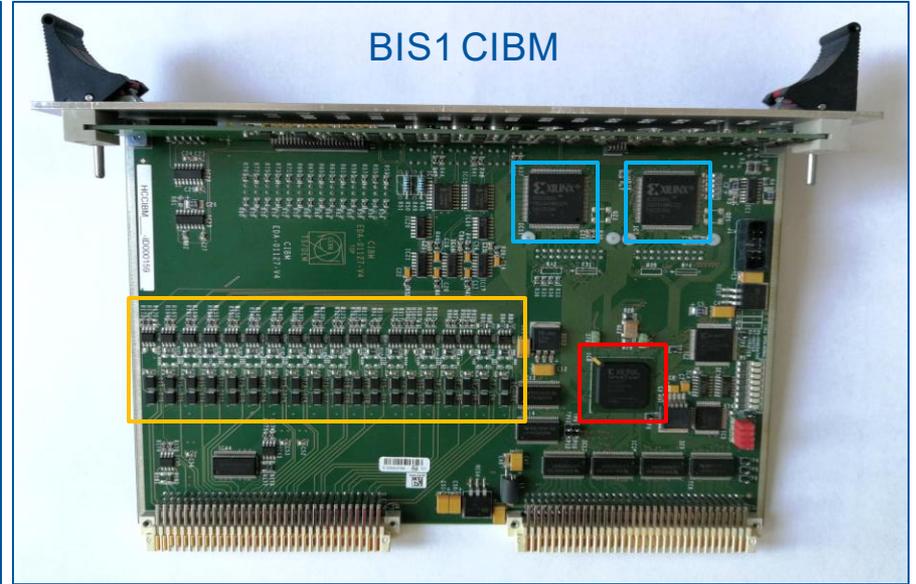

# CIBM Architecture

BIS2 CIBM

BIS1 CIBM

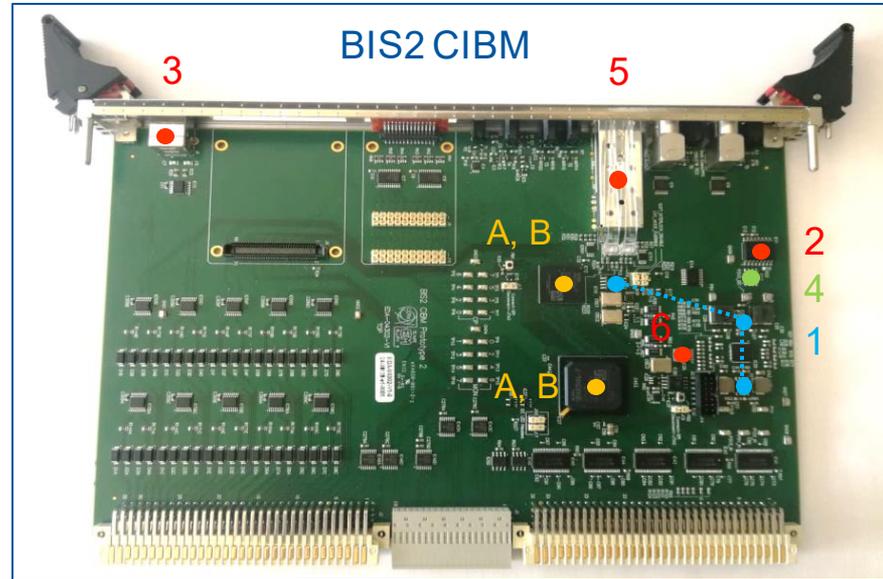

# New Peripherals

## I2C:

1. Temperature Sensors
2. RTC (Real Time Clock)
3. UART
4. EEPROM
5. SFP
6. ADC

## FPGA - XADC:

- A. Temperature Sensors
- B. Power Supplies

# Future

4 BIS2 CIBMs under test

BIS2 Crate

Space for new and exciting BIS2 systems

# Thanks for Watching

## The Consolidation of the Beam Interlocks System
