

Editor's Note

In the interests of expediency and cost saving, several compromises were effected in publishing these Proceedings. Authors were requested to present manuscripts in reproduction-ready format and corrections on these were kept to a minimum. Since type styles varied, inconsistencies in appearance were unavoidable. Some papers required retyping, and authors did not have opportunity to proofread these; any errors introduced are the editor's. Discussions were edited by the respective Session Secretaries, and their assistance is gratefully acknowledged. We have tried to preserve the essence and spirit of the Conference, with our objective being the most expeditious and economical Proceedings possible.
